

ISOCELL® X-wall

The ultimate solution for modern natural ventilation!
Simply the **BRIGHTEST**, the most **INSULATING** and the most **STRUCTURAL** system that you can find!

ISOCELL® X-WALL

ISOCELL® X-wall

**DO AWAY WITH THE ICE
AND THE COLD WITH THE
UNIQUE TECHNOLOGY
OF ISOCELL® X-WALL**

These diagrams illustrate the heat zone

Nearly **3X** the insulating power of **ANY** other system on the market today!

THE ISOCELL® X-WALL MEMBRANE OFFERS:

The "X" structure of membrane inserted inside two films by the **ISOCELL® X-wall** technology offers the possibility to manufacture this unique ventilation wall while having multiple insulating cells.

This insulated barrier of the multi-wall **ISOCELL® X-wall** minimizes the heat transference of the colder external air and the warmer interior air cells.

By eliminating the heat transfer, the Multi-Wall **ISOCELL® X-wall** is the most insulating and efficient system on the market!

• 3X more insulation R4.4 (U1.3)

• Increased reliability

• Elimination of ice formation

• Stronger, more solid core structure

• Excellent luminosity

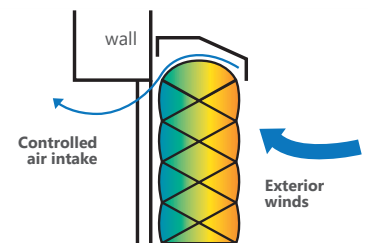

• Improved lowering of the membrane due to the X design

• Continuous opening up to 10 feet (3 m) and double opening up to 14 feet (4.27 m)

Our unique system includes rigid top and bottom moldings designed to prevent unwanted air and water infiltrations and create an **effective windbreaker during the winter** when the minimum ventilation stage is in function.

Winter ventilation with wind-breaker
