EDGE ELITE

A SMART CLIMATE CONTROLLER
WITH A LARGE COLOR TOUCH SCREEN DISPLAY

Features:

- 15" simple touch screen navigation.
- Triple protection level: Redundancy, backup method (smart) and emergency mode (N/O, N/C).
- Data is accessible from anywhere and compatible with the most popular hand-held devices.
- Generating alarms by text or email.
- Data are updated in real-time and can be stored as long as desired.
- Real multi-room or multi-building control - thanks to the smart relay panels.
- Current sensors on all outputs to protect the entirety of your equipment (with alarm).
- Temperature, humidity, static pressure, ammonia and carbon dioxide readings and compensation.

- Weather station with wind speed, wind direction, and rain sensor (effective wind calculation).
- Constantly evolving using web updates which give access to the latest technologies.
- Training, monitoring, and quick assistance through remote access to assist your customer and colleague via MyEDGEConnect app (available in both App Store and Google Play).
- Tested with the highest standards for reductions of electromagnetic noise (stray voltage).
- Includes feeding and lighting control features.
- Designed and manufactured in Canada with all global certifications (UL, CSA, CE, CCC).
- Software is available in multiple languages, including French, English, Spanish, Portuguese, German, Russian, Chinese, Japanese, and more...
