

# POLYTHERM

## NATURAL VENTILATION

### A RELIABLE, INSULATING, AND TRANSPARENT SYSTEM!

- Provides great translucency and insulation R1.6 (U3.5)
- Offers 2 distinct ventilation stages
- Automatic, simple, and without a pulley
- Silent, economical, and no maintenance
- Single opening reaching 5 feet (1.5 meters)
- Made of clear U.V. treated polyethylene with 5 years of warranty
- 2 X 51 watts blowers allow air under pressure between the 2 walls to obtain insulation
- Oval shape to make raising and lowering easy
- Standard size and format to make replacement easy.

**SINGLE  
POLYTHERM** ►

### A LARGE OPENING RIGID SYSTEM!

- Opening reaching 10 feet (3 meters)
- Offers 4 distinct ventilation stages for more precision
- More rigid and safe frame due to its solid permanent center
- The central support piece is designed to provide rigidity without obstruction
- Increased stability of membranes when strong winds occur, which extends the lifetime of the product
- Possibility of replacing only 1 section if broken instead of the entire wall.
